Subject: Regulations

2/18/2017

Good Morning Respected Mr. Pruitt,

CONGRATULATIONS on your selection as EPA Administrator. I like to bring to you some of the regulations that need to be repealed

1. The new MDL determination Revision 2
2. NESHAP Regulations on Standby Generators. These generators run half hour a month for run check and why need regulations on these generators
3. Storm water MS4 regulations to observe the discharge when you cannot do anything about the discharge. The operator has to collect samples within half an hour of starting the discharge and this puts the staff in danger of their life (lighting strikes/jheavy rain)

Hope you will repeal these regulations

Thanks

Kurian Joychan
